

# IT Solution Engineer, Manufacturing/GMP (m/f/d)

Full time | in Bad Säckingen or Work from Home

You are an IT and server expert with industrial experience? Become part of an agile team of experts and work with a high degree of personal responsibility in a unique family environment for leading international companies in the process industry. More than 40,000 users around the globe use our Shiftconnector® solution in the cloud or on-premise to improve communication and documentation in production operations.

## Your chance

Every employee plays an important role in the growth and success story of eschbach. Become part of an established and at the same time visionary company with start-up character:

- Grow personally and professionally through your challenging tasks and regular training as well as development opportunities
- Make a difference with a degree of freedom which includes enough responsibility and commitment
- Enjoy working in a bright, modern office with cafeteria, roof terrace and free parking lots
- Coffee, water, fruit and a lunch allowance are included
- Get relocation-support for the move to the region of Bad Säckingen / Southern Germany

## Your tasks

- Taking over operative and conceptual responsibility for our Shiftconnector® Cloud SaaS platform
- Ensuring the continuous availability of our cloud and on-premise customer implementations
- Technical responsibility for implementation projects of the Shiftconnector® Plant Process Management Solution for well-known industrial customers
- Solution specification and configuration of interfaces for the integration of Shiftconnector® into the system landscape of our customers, e.g. SAP® PM or OSISoft® PI
- Project partner for the validation of GMP implementations, preparation of relevant documentation
- Design and further development of solutions for deployment and update automation
- Introducing new technologies and projects in the area of DevOps and application management for our cloud and on-premise solutions

- Rollouts of new versions and performance of complex update projects

## Your profile

- Completed professional training or studies in the area of IT, alternatively equivalent knowledge from a similar activity
- At least five years professional experience in IT-Administration / System Engineering
- Entrepreneurial drive and a proactive way of working
- Good knowledge of web application administration and server operating systems, especially MS Windows Server, IIS and SQL
- Excellent English and German communication skills
- Nice-to-have: Experience in web development, e.g. SQL, C#.NET and HTML/JS as well as PowerShell
- Experience with Computer Software Validation (CSV) and GMP systems is an advantage

**Help creating our future and become part of the eschbach family.
