

Senior .NET Developer (m/f/d)

Full-time I in Bad Säckingen

You are an up-and-coming organizational talent? You want to participate in a young, future-oriented and at the same time established company? Become part of an agile team of experts and work with a high degree of personal responsibility in a unique family environment for leading international companies in the process industry. More than 50,000 users around the globe use our Shiftconnector® solution in the cloud or on-premise to improve communication and documentation in production operations.

Your chance

Every employee plays an important role in the growth and success story of eschbach. Become part of an established and at the same time visionary company with start-up character:

- Work closely with the development team to produce first class software with a high degree of personal responsibility
- Grow personally and professionally through your challenging tasks, regular training and development possibilities
- Become part of a young, dynamic team where collaboration, open-mindedness and team-spirit are an essential part of the work ethic
- We offer you a secure employment in a professional, family environment
- Your working day begins in a bright, modern office with cafeteria and roof terrace
- Coffee, water and a lunch allowance are of course included
- Enjoy generous home office rules for the perfect mix of team time, focus time and work-life balance
- Relocation support to Bad Säckingen/South Germany

Your tasks

- Communication and close cooperation with developers, QA Team, product management and operations team
- Analyzing and understanding customer requirements and customer processes
- Developing and documenting technical solution concepts
- Implement changes in backend and database

Your profile

- 5 years professional experience in C#, MS SQL Server, WebAPI, ASP.NET, .NET 4.7 + .NET Core
- Experience with Software Architecture, Database Design and UML
- Experience with testing (Nunit, Selenium, JMeter)
- Working in DevOps environment: Knowledge in SDLC
- Experience in the chemical, pharmaceutical industry or in the manufacturing industry
- Experience with IIS, Azure and Docker
- Excellent English and German communication skills

Help creating our future and become part of the eschbach family.
