

Consultant, Digital Plant Process Management (m/f/d)

Full-time I in Boston

Are you a communicative type of person with an affinity for software solutions? Do you have talent and passion for project management? If so, we invite you to become part of a unique family environment and work proactively in one of our expert teams with a high degree of personal responsibility. We are a leading international company in the process industry with more than 40,000 users around the world who are benefiting from our software solution Shiftconnector®.

Your chance

Every employee plays an important role in the growth and success story of eschbach. Become part of an established and at the same time visionary company with start-up character:

- Grow personally and professionally through challenging tasks, regular training and development opportunities
- Make a difference with a degree of freedom which includes personal responsibility and commitment
- Be part of a dynamic and international team where collaboration, open-mindedness and team-spirit are an essential part of the work ethic
- We offer you secure employment in a professional, family environment with the chance of international travel and work experience

Your tasks

- Customer consulting and requirements analysis with focus on chemical and pharmaceutical manufacturing
- Specification of deliverables as well as internal and external coordination with team colleagues and the customers' project managers
- Taking over responsibility as project manager for SaaS implementation projects
- Conducting and moderating workshops and trainings for our customers
- Support of pre-sales activities, especially product demos and presentations
- Recording work processes of customers
- Developing proposals for solutions
- Drive innovation and change processes

Your profile

- Studies in the field of economics, business informatics or engineering or equivalent qualification
- 3+ years professional experience as a consultant for enterprise software
- 5+ years professional experience in IT/ software companies
- Experience with OT or IT project management and implementation
- Experience in digitalization for chemical or pharmaceutical manufacturing is an advantage
- Confident and convincing appearance towards customers
- Creativity in the implementation of requirements
- Excellent English communication skills

**Help creating our future and become part of the eschbach family.
Ready for the challenge? Apply now!**
