

Software Integration Engineer, Digital Manufacturing (m/f/d)

Full-time | in Bad Säckingen

You are an interface expert and have a talent for customer communication at the same time? Become part of an agile team of experts and work with a high degree of personal responsibility in a unique family environment for leading international companies in the process industry. More than 50,000 users around the globe use our Shiftconnector® solution in the cloud or on-premise to improve communication and documentation in production operations.

Your chance

Every employee plays an important role in the growth and success story of eschbach. Become part of an established and at the same time visionary company with start-up character:

- Work in an agile and ambitious team and enjoy a pleasant working atmosphere
- Good onboarding in close collaboration with team and team leader
- A wide range of opportunities for further development and training
- Make a difference with a degree of freedom which includes enough responsibility and commitment
- Work in a bright, modern office with a cafeteria, roof terrace and free parking lots
- Coffee, water, fruit and a lunch allowance are included
- Strong team spirit with regular events
- Generous home office rules for the perfect mix of team time, focus time and work-life balance
- Relocation Support to Bad Säckingen/South Germany

Your tasks

- Scoping of interfaces for offers
- Technical consulting for our customers in the process industry
- Technical specification, data object and attribute mapping, interface design
- Architecture of system integration at network level for cloud and on-premise environments
- Router Configuration and implementation of standard shift connector interfaces, also with OPC router
- Scripting of Web API interfaces
- Subproject responsibility
- Project and product documentation
- Support with technical problems on the 2nd/3rd level
- Support our sales team in the preparation of proposals

Your profile

- Completed education or further training in the relevant field, e.g. IT specialist for system integration, studies in applied computer science / business informatics or similar professional training
- Knowledge of REST APIs and SQL
- Experience in C#, SAP PM or OSISoft PI is of advantage
- Working experience in an industrial environment
- Communicative personality
- Understanding of customer needs and requirements
- Very good English communication skills, good knowledge of German
